Ofgem restructured

CCS could be a boom industry for the UK

## European News

CCS demonstration projects must be realised

## International News

FutureGen Alliance signs agreement with DOE

Test to evaluate CO<sub>2</sub> storage in unmineable coal seams begins

Japan and Victoria announce clean coal collaboration

Callide A Oxyfuel project on schedule

Shell and Shenhua sign MOU

## Reports

Feasibility of CCS in Rotterdam assessed

New paper on CCS in China

## UK News

### Ofgem restructured

8 September 09 - Ofgem has announced the creation of a new business unit, Ofgem E-Serve, as part of major restructuring in order to increase its role in delivering a low carbon economy in the UK. The new unit will focus on administering environmental programmes and the delivery of sustainability projects, including running the proposed CCS levy. View the [press release](#).

### CCS could be a boom industry for the UK

9 September 09 - New research from the University of Edinburgh has found that CCS could be one of the boom industries over the next two decades in the UK. Britain could make up to £5 billion per year selling licences to store CO<sub>2</sub> to other countries and the market for CCS technology could be worth a further £3 billion to £5 billion. The CCS industry could support up to 240,000 jobs, which is almost as much as current levels in the North Sea oil and gas industries. Speaking at the British Science Festival, Dr Haszeldine said: "We need to capitalise on our technical ability and this huge storage asset, and do not just one demonstration project - which the Government has talked about being ready by 2014, but to go for those four demonstrations, and probably to five, by 2016." View the [full story](#) and a [further story](#).

## European News

### CCS demonstration projects must be realised

7 September 09 - Ottmar Edenhofer, co-chairman of the UN Intergovernmental Panel on Climate Change, has said that CCS demonstration projects must be made a political priority in Europe to prove that the technology works and that it can be applied in developing countries. "Carbon capture and storage (CCS) is indispensable if we want a new deal for the climate," he said. View the [full story](#).

## International News

### FutureGen Alliance signs agreement with DOE

1 September 09 - The FutureGen Alliance has signed a Cooperative Agreement with the US Department of Energy allowing development to continue at the proposed 275 MW coal gasification with CCS facility in Mattoon, Illinois. The \$17.3 million agreement covers preliminary design activities until the end of this year, following which a decision on whether to take the project forward to final design and construction will be made. View the [press release](#).

### Test to evaluate CO<sub>2</sub> storage in unmineable coal seams begins

8 September 09 - CO<sub>2</sub> injection has begun in a \$13 million trial to evaluate enhanced coalbed methane recovery with CO<sub>2</sub> storage in West Virginia. The first-of-a-kind project is a collaboration between CONSOL Energy Inc., West Virginia University and the National Energy Technology Laboratory, and is sponsored by the US Department of Energy. View the [press release](#).

### Japan and Victoria announce clean coal collaboration

8 September 09 - The Victorian Government (Australia) and the Japan Coal Energy Centre (JCOAL) signed a Memorandum of Understanding to collaborate on clean coal technologies. The collaboration will focus on high-efficiency next-generation power plants, coal gasification, CCS, efficiency improvements for existing coal-fired power stations and coal to liquids. View the [press release](#).

### Callide A Oxyfuel project on schedule

8 September 09 - The 30 MW Callide A Oxyfuel project is on schedule to begin operating in July to September 2011, according to J-Power's Managing Director. The CCS project in Queensland Australia is expected to cost \$200 million and is a collaboration between several Japanese and Australian companies. View the [full story](#).

### Shell and Shenhua sign MOU

9 September 09 - Shell (in China) and Shenhua have signed a memorandum of understanding (MOU), agreeing to explore opportunities for conducting joint research into coal gasification and the possible application of CCS technology. View the [press release](#).

## Reports

### Feasibility of CCS in Rotterdam assessed

3 September 09 - A report published by the Rotterdam Climate Initiative has concluded that large-scale capture, transport and storage of CO<sub>2</sub> is technologically feasible in the Port of Rotterdam. The report finds that by 2025 a CO<sub>2</sub> network in the area could have the capacity to capture 20 million tonnes of CO<sub>2</sub> annually. The report also studies business cases for CCS and estimates that total costs (for the whole CCS chain) range from €40 to €70 per tonne of CO<sub>2</sub>. View the [full story](#) and a summary of the [report](#).

### New paper on CCS in China

4 September 09 - A paper entitled 'The Real Drivers of Carbon Capture and Storage in China and Implications for Climate Policy' has been published by researchers at Stanford University. Richard Morse, an author of the report, estimates that it will cost up to \$400 billion over 30 years to install CCS at power plants in China. View the [full story](#) and the [report](#).

## Contact Us

The Carbon Capture & Storage Association (CCSA) exists to represent the interests of its members in the business of capture and geological storage of carbon dioxide (known as Carbon Capture and Storage, or CCS) as a means of abating atmospheric emissions of carbon dioxide and potentially, as a means of enhancing the production of fossil hydrocarbons. From its base in London the CCSA brings together specialist companies in manufacturing & processing, power generation, engineering & contracting, oil, gas & minerals as well as a wide range of support services to the energy sector such as law, banking, consultancy and project management.

## Upcoming events

### The 3rd annual ACI Carbon Capture and Sequestration Summit

14 - 15 September 2009, Washington, United States

The 3rd annual ACI Carbon Capture and Sequestration Summit provides a senior-level forum in which the unexplored nature of the interface between power generators and the oil industry, and their disparate CCS business models and approaches to risk will be addressed. The goal of the event is to encourage those focused on capture, and those focused on storage, to come together and develop a greater understanding of current and future needs, and an integrated approach for commercializing CCS.

Key topic areas to be explored include:

- The changing market conditions for CCS technologies
- The current and evolving Federal and State legislative/regulatory environment
  - The impact of expected national cap and trade legislation
  - Regulatory structure for carbon storage
  - Regulatory framework for Enhanced Oil Recovery (EOR) as a driver for commercial CCS projects
- Funding, project economics and business models
- Accelerating pipeline infrastructure development
- Risk assessment, monitoring and long term liability for storage
- Using CCS to realize the economic benefits of Enhanced Oil Recovery (CO<sub>2</sub>-EOR)
- Public acceptance for CCS

CCSA members are entitled to a \$200 discount - quote 'TBD'

### Carbon Capture and Storage World Summit

Set to take place on September 22-24th in Arlington, Virginia the Carbon Capture World Summit 2009 will provide an opportunity for international political figures and regulatory bodies, financial institutions and energy corporations to discuss the obstacles and viability of carbon capture and storage, both on a large and small scale. The event will look at funding, international policy and technology in the months leading up to the Copenhagen Climate Conference. Through commercial case studies, this event will also address technical and commercial hurdles, the cost of implementing carbon sequestration and energy consumer acceptance issues.

Featuring a presentation from Dr. Victor Der, Acting Assistant Secretary for Fossil Energy of the US Department of Energy and organizations such as Air Liquide, the Bellona Foundation, the Ontario Ministry of Natural Resources and Ernst & Young participating as speakers, this event promises to provide a well-rounded approach to the most pressing issues facing CCS.

A high level of international participation expected and with numerous networking breaks and interactive panels, attendees will have an opportunity to interact with representatives of other countries also involved in CCS discussions and demonstration projects.

Members of the Carbon Capture and Storage Association are eligible to attend the event at a 25% discount. To receive this discount, please contact delegate sales manager John Buss at +1 207 202 309 7296 and mention the CCSA or use discount code CCSA when registering online at [www.carboncaptureandstorageconference.com](http://www.carboncaptureandstorageconference.com).

## South African Carbon Capture & Storage Conference

South African

## carbon capture & storage conference

29-30 September 2009, Sandton Sun, Johannesburg, South Africa

South Africa is a developing country with a coal based energy economy and has committed internationally to stabilising emissions by 2025. CCS provides one option to stabilise greenhouse gas emissions and the South African government has declared CCS a national research priority.

The conference is designed as an entry level introduction to CCS. It is therefore aimed at executives, geologists, engineers, scientists, policy and regulation developers, researchers, students, NGO's, analysts, risk managers and all interested and affected stakeholders.

The conference aims to develop a basic understanding of the various technical, economic, policy and regulatory aspects of CCS. In addition, the results and experiences of a number of existing CCS facilities will be presented.

The conference will include presentations by world renowned experts in the field of CCS, including:

- Stefan Bachu (Alberta Research Council)
- John Gale (IEA GHG R&D Programme)
- John Bradshaw (Greenhouse Gas Storage Solutions)
- Nick Otter (Global CCS Institute) representation from CO2CRC, Schlumberger, UK Department of Energy and Climate Change and the TNO

The conference will be followed by a number of workshops and short training courses and will include the gala launch of the newly formed South African Centre for Carbon Capture and Storage.

For more information or to register, please visit

[www.ccsconference.co.za](http://www.ccsconference.co.za)

or email [ccsconference@africaneartevents.co.za](mailto:ccsconference@africaneartevents.co.za)

## The Carbon Show

**The Carbon Show**  
The exhibition for trading, reducing and managing carbon.  
ExCel London, 29-30 September 2009

The Carbon Show is the international exhibition for trading, reducing and managing carbon. Launching on 29 and 30 September at ExCel, London, The Carbon Show offers the opportunity to network, meet new potential clients and contacts and discuss the new climate deal with industry leaders. For further details and to pre-register for free entry to the exhibition, please visit <http://www.thecarbonshow.com>

## Brussels Carbon Capture and Storage Summit 2009: Getting it right for Copenhagen

Event title: Brussels Carbon Capture and Storage Summit 2009: Getting it right for Copenhagen

Date: 6th October 2009

Venue: Sofitel Europe Brussels Hotel, European District, Brussels

Contact person: James Wilmott / [james.wilmott@forum-europe.com](mailto:james.wilmott@forum-europe.com) / +44 (0) 2920 783 028

Event website: <http://www.ccsconference.eu>

The major meeting point prior to Copenhagen for stakeholders involved in CCS is organised by Forum Europe and Bellona Europa. Limited places are available.

### CONFIRMED SPEAKERS INCLUDE:

- Andris Piebalgs, Commissioner for Energy, European Commission
- Chris Davies, Member, European Parliament
- Frederic Hauge, President, Bellona Foundation
- Piotr Tulej, Head of Unit, DG Environment, European Commission
- Lena Sandberg-Morch, Senior Officer, State Aid and Competition Department, EFTA
- Lars Stromberg, Vice President R&D, Vattenfall
- Ruth Hampton, Head of International CCS, Department of Energy and Climate Change (DECC)
- Stefano Puppini, Unit K2 - Energy Conversion and Distribution Systems, DG Research, European Commission
- Luc de Marliave, Climate Change Coordinator, Total
- Claude Roulet, Senior Advisor, Schlumberger
- Sanjeev Kumar, ETS Coordinator, WWF
- Petre Petrov, Research Programme Officer, European Commission
- Alain F. Berger, VP European Affairs and Head of the Brussels Office, Alstom
- Scott Brockett, Policy Officer, DG Environment, European Commission
- Jesse Scott, Brussels Programme Leader, E3G

Join more than 200 of your peers for the EU CCS conference prior to Copenhagen. Online registration is available at <http://www.ccsconference.eu> where you will find full registration costs. CCSA members can enjoy the early bird rates right up until the event day saving you €100. After the 25th August 2009 simply use discount code CCSA100 when registering online at <http://www.ccsconference.eu>. Book early to secure a place!

## Power Generation Middle East

**11-13 October 2009**  
**Abu Dhabi National Exhibition Centre**

11 - 13 October 2009, Abu Dhabi National Exhibition Centre

The region's premier exhibition for the power industry

Main areas of interest include:

- Power Generation
- Transmission & Distribution
- Automation & Controls
- Research & Technology

Exhibitor Testimonials

"The show has been really busy... We've met a large number of potential new customers..." N. Selvukumar, Mohamed Abdulrahman Al-Bahar (Caterpillar) [Read More](#)

"We've had plenty of visitors and lots of good business leads - up to 100 serious ones." Sandra Hackmann, Envision [Read More](#)

For more information please view the [website](#)

## Experts 2009

13 - 14 October 2009, Berlin, Germany

Modern Power Systems invites you to attend the Second Annual Experts conference which will bring together key authorities to provide answers to these and all the other topical questions. From clarifying the latest European Directives and implementing biomass co-firing to achieving a more efficient power plant, this conference will provide in depth analysis into solving the critical issues facing the industry today.

With CO<sub>2</sub> concerns so dominant in the public and political arena as well as the conventional pollutants of NO<sub>x</sub> and SO<sub>x</sub>, reducing emissions is an enormous task for power plant operators. Furthermore this responsibility provides colossal challenges which must be overcome.

The advent of stringent European Directives must be adhered with otherwise power plants face the possibility of being shut down. How will the changing regulations affect power plants and what technologies can help meet these challenges?

CCS members receive a 10% discount contact [adriangray@vibeevents.com](mailto:adriangray@vibeevents.com) to receive your reference code

For more information please email [adriangray@vibeevents.com](mailto:adriangray@vibeevents.com) or go to [www.modernpowersystems.com/experts](http://www.modernpowersystems.com/experts)

## Developing Carbon Capture and Storage on a Commercial Scale: Overcoming the Barriers to Implementation

Developing Carbon Capture and Storage on a Commercial Scale: Overcoming the Barriers to Implementation

23rd October 2009, Eversheds, London

New coal-fired power stations are needed in order to meet the energy gap and ensure a diverse energy mix. With coal-fired power stations being built globally at a rapid pace, making coal clean is an imperative without which climate change goals will not be met. Carbon Capture and Storage has the potential to reduce CO<sub>2</sub> emitted from fossil fuel plants by up to 90%.

With the Government currently consulting on the conditions to be placed on future coal power stations this conference focuses on the commercial viability of the technology and looks at the role of carbon trading in improving the economics of carbon capture projects.

How feasible is it for all coal power stations to operate carbon capture and storage and what are the implications for the industry and for the consumer?

Issues to be discussed include:

- Why we need clean coal and the Government's proposals for CCS demonstration and deployment
- European policy towards carbon capture and storage and the impact of the EU ETS
- The scale of the challenge
- The impact of the carbon markets on the economics of carbon capture and storage
- The implications for investors and for consumers
- Investing in and developing the infrastructure for capturing, transporting and storing carbon

For further information and to register please visit: <http://www.eventsforce.net/carboncapture>

For CCSA members there is a discount available when registering online. Please enter CCSA into the field marked 'discount code' to obtain the discounted rate of £199 + VAT.

## Carbon Capture and Storage - Making it happen

28-29 October 2009, Institution of Mechanical Engineers, London

Book now or view the full programme: [www.imeche.org/events/s1439](http://www.imeche.org/events/s1439)

Event overview

Carbon Capture and Storage is one of the most exciting opportunities for reducing carbon emissions, securing affordable low-carbon energy supplies and diversity of energy sources. The technology for achieving substantial reductions in carbon emissions exists, but the regulatory and economic frameworks do not allow us to take full advantage of it. This seminar will describe and challenge the current position and provide an essential update on both the legislative and technical barriers to this technology.

Attending this event will help you:

- Understand the policy and regulatory issues surrounding Carbon Capture and Storage (CCS)
- Appreciate the importance of CCS to achieving carbon emission reductions
- Discover the latest technological developments in CCS, both in the UK and internationally
- Identify the options and health and safety issues for transportation and storage
- Learn how CCS can help to achieve the level of carbon emission reductions required by 2050
- Gain a deeper understanding of the financial realities of delivering zero-carbon energy
- Question whether coal really is a 21st-century fuel
- Learn how to make this exciting technology a commercial reality
- Explore options for the transportation and storage of carbon dioxide
- Understand the health and safety issues surrounding the transmission of carbon dioxide

This event is an ideal opportunity for plant owners, operators, investors, financial advisers, insurers and policymakers to gain an understanding of the range of issues involved in developing, owning and operating power/process plants with carbon capture.

**Reduced Member Rate for the following supporting organisations:** ICE, IChemE, EI, CCSA, OES, OCA, EEMUA, EIC. Day 1: £240 + VAT, Day 2: £240 + VAT, Day 1 & 2: £360 + VAT (full details on event website).

## The 3rd Annual European Carbon Capture & Storage Summit

18-19 November 2009, London

Earlier this year the UK government unveiled a new strategy of pursuing coal power, pledging that no new coal plants will be developed unless they were able to store some of their carbon emissions underground. With many challenges and opportunities facing carbon capture & storage at the moment, City & Financial holds this timely summit, the third in the successful series, to discuss and debate some of these key issues by bringing together a speaker panel of exceptional quality.

Keynote address

Charles Hendry, Shadow Minister for Energy

Among other expert speakers are:

- Stephen Adamson, Commercial Manager CCS, Scottish Power
- Andrew Austin, Senior Associate, Freshfields Bruckhaus Deringer LLP
- John Best, Chief Executive, East of England Energy Group (EEEG)
- Dr Tony Booer, Schlumberger Oilfield
- Paul Bowden, Partner, Freshfields Bruckhaus Deringer LLP
- Simon Brooks, Vice President, European Investment Bank
- Keith Burnard, Senior Energy Technology Specialist, International Energy Agency
- Milton Catelin, Chief Executive, World Coal Institute
- Jeff Chapman, Chief Executive, Carbon Capture and Storage Association
- Jon Gibbins, Senior Lecturer, Imperial College London
- Klaus Hammer, Managing Director - Generation, Eon UK
- Nick Horler, CEO, Scottish Power
- Bronwen Northmore, Head of CCS Policy, Department for Energy and Climate Change
- Jan Panek, Head of Unit, Coal and Oil, European Commission
- Ian Phillips, Director CO2 Infrastructure, CO2 Deepstore Ltd
- Dr Nicholas Riley, Head of Science Policy Europe, Coordinator of CO2, Geonet
- Emily Rochon, CCS Policy Coordinator, Greenpeace
- Stanley Santos, Project Manager Capture and Integrated Systems, IEA Greenhouse Gas R&D Programme
- Ian Temperton, Managing Director, Advisory, Climate Change Capital

- Chris Train, Director of Network Operations, National Grid
- Richard Vernon, Principal-Energy, SLR Consulting

Attendance at this summit will be invaluable for all those involved in the development of CCS, including generating and utility companies, technology suppliers, oil and gas companies, energy ministries, energy regulators, project financiers, lawyers, technical consultants and academics.

**CCSA members DISCOUNTS:**

20% discount off the standard private sector fee

10% discount off the standard public sector/academic fee

To receive this discount, please quote CCSA and contact Martina Hayter ([mhayter@cityandfinancial.com](mailto:mhayter@cityandfinancial.com))
